

Your Partner in Wind

[REDACTED]

[REDACTED] established in 2013, is a company that distributes **machinery and services** in Italy and around the world in this specific sectors: **wind, oil & gas, petrochemical, piping, bio-methane, naval carpentry, medical and food industries.**

[REDACTED] chosen by the most important brands of machinery for industrial plants, offers a **complete service** from sales to after-sales.

services:

Sale and Rental

Maintenance

Certification lab

Drone inspections

 **Sale:**

 distributes **hydraulic equipment** for the wind sector.

The best brands of the **highest quality** to best support you in your maintenance, tightening, untightening and bolt certification work.

We offer an important **pre and post** sales consultancy service with the possibility of customizing the products.

Build your set

Cold rental:

. offers a wide range of equipment for daily, weekly and monthly rental, responding to every need of client companies. Each piece of equipment is complete with certification.

Factory:

 thanks to **experienced staff** has managed in a few years to create an important **maintenance factory** with which it supports the service and maintenance of the machines of its customers.

Samisud s.r.l. is an **authorized workshop** of various brands and specializes in the repair of:

- Hydraulic torque wrenches
- Impact wrenches
- Pneumatic hacksaw
- Hydraulic cylinders
- Power units

Certification Lab:

 .i. boasts of the **first certification, calibration and torque measurement laboratory** in southern Italy and the first and only laboratory for the certification of hydraulic wrenches in the whole nation in accordance with the ISO 9001 standard.

Thanks to this new service, Samisud responds to the needs of companies regarding the **ISO 6789: 2017** standard with a complete laboratory of **constant temperature environments** according to the standard. At the end of each certification process, customers will receive the certification report valid for 12 months.

We carry out the certifications of:

- Torque wrenches: from 0Nm to 1.000 Nm
- Hydraulic torque wrenches: from 1.000 Nm to 50.000 Nm
- Controlled-torque impact wrenches: from 0 to 2000 Nm
- Pressure gauges: from 0 to 2.000 Bar
- Hydraulic tensioners

Personnel training:

██████████.l. thanks to the **twenty-five years** of experience of its staff, carries out certified training courses and demonstrations for the use of specific machinery for the **wind power sector** (onshore and offshore). The courses take place both in the company headquarters and at the client company.

The course aims to **train the customer's company personnel** in the use of the latest technology machinery, transmitting all the knowledge, both theoretical and practical, necessary to guarantee work safety in the plant and in the company.

At the end of the course, each student will receive the **certification signed** by the specific certification organisation for the wind energy sector.

Drone inspections:

██████████. thanks to highly specialized technicians and engineers, performs the **inspection service** of **wind turbines** that are constantly exposed to the action of **atmospheric agents**.

Thanks to highly innovative drones, **we detect even the smallest defects and any possible corrosion** even in hidden points; with this new technology **we guarantee** the safety of personnel, work and the condition of the wind turbines.
