

For 20 years, it has been a specialist in the covering of automobile parts: armrests, door panels, door handles, seat elements, dashboards, decorative strips, gear lever gaiters, soundproofing elements, safety parts.....

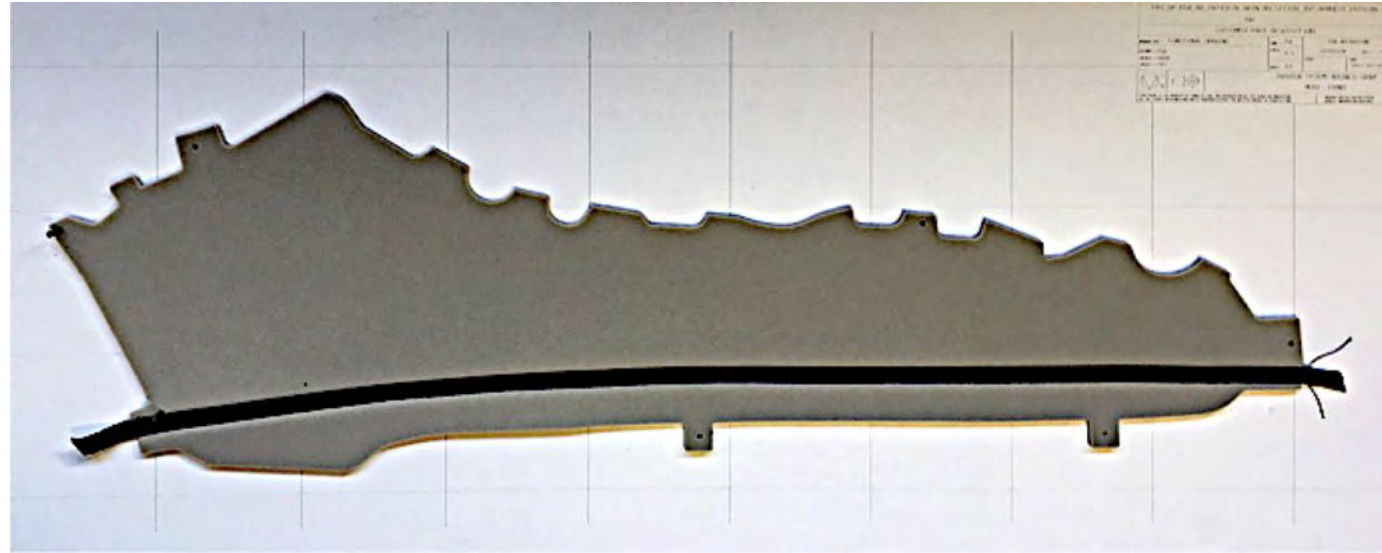

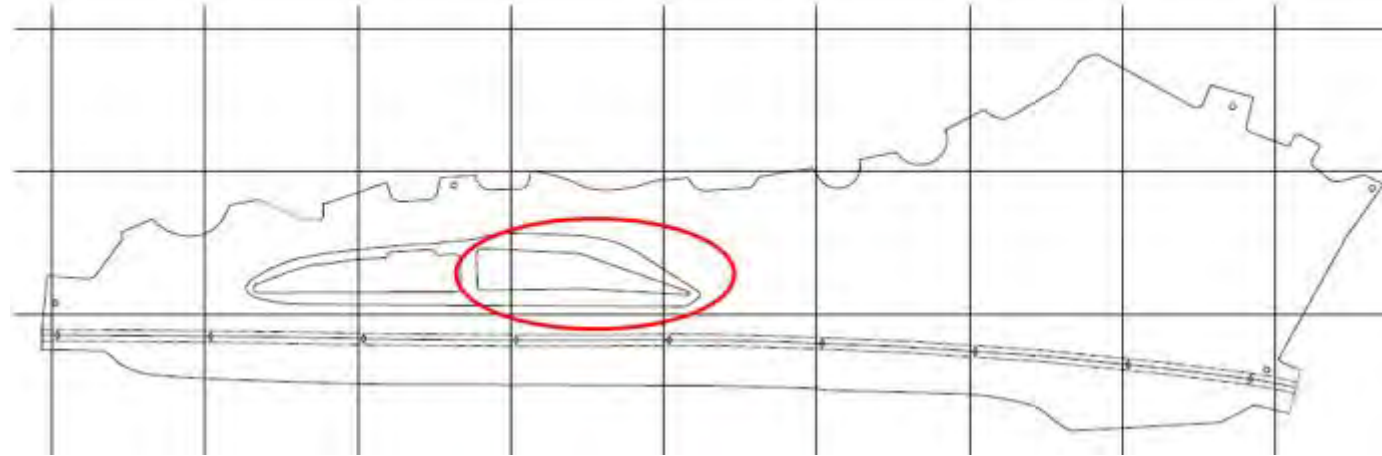

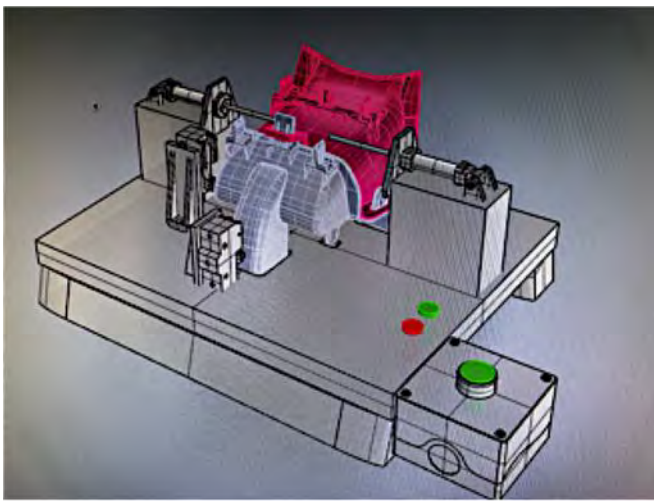

it brings together the professions of cutting, sewing, lamination, laminating, thermocompression, sheathing, technical cutting (aramid, carpet, leather, etc.), ultrasonic welding, plasma treatment and assembly plastic parts

We use leather of all types, plastic coated textiles (TEP PVC & PU), Alcantara, wood coverings, complex fabrics, carpets. As well as PU or Pe foams in thermocompression

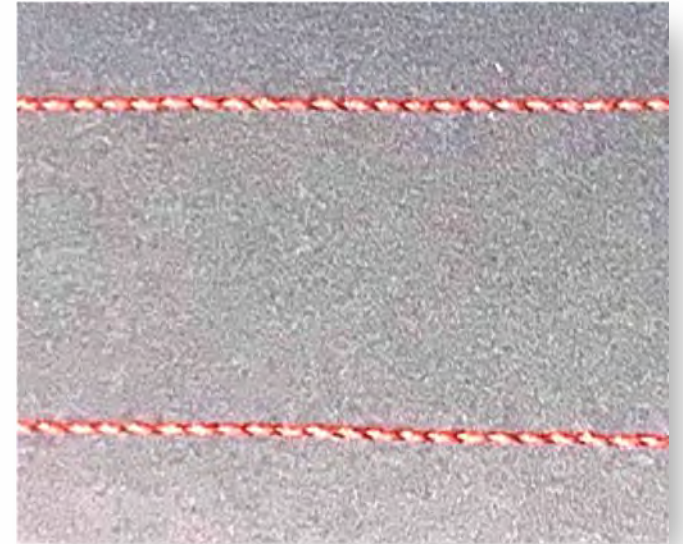

We ensure the manufacture of cladding according to our customers' designs and are able to carry out all operations of shaping materials and assembling components. Our R&D department participates in product design with equipment manufacturers and manufacturers
