

LABA-TEX

Absorbs water and water based liquids

WATER ABSORBING SNAKE

General specifications

Dimensions: 120 x 10 cm

Absorbency: 4 / 8 liters

Height when saturated: 7 / 10 cm

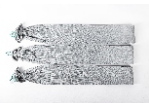

Description

Due to its excellent absorption characteristics, this absorbent sock is ideal for preventing spills or managing leaks that have already occurred. It begins working immediately upon contact with water. The rope loops at the ends of the sock make it easy to pick up and carry once filled. The absorbent acts as a barrier, keeping water in its gelled state. It is flexible and can be wrapped around various objects for versatile use.

Where to use

- Protect windows, entryways and doors
- Contain leaks from sinks, washing machines, toilets and radiators
- Ideal for use with freezers and coolers

How does it work?

General specifications

Dimensions: 50 x 25 cm

Absorbency: 5 liters

Height when saturated: 7 cm

Description

Due to its excellent absorbent properties, this absorbent mat is ideal for preventing spills or managing leaks after they occur. It starts working immediately upon contact with water. The rope loops at each end of the mat make it easy to pick up and carry once filled. The mat can also act as a barrier, keeping water contained in its gelled state.

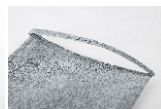

Where to use

- Under air conditioners, freezers, coolers
- Under leaking sinks, washing machines, pipes and radiators
- In kitchens, on ships and in boats

How does it work?

WATER ABSORBENT MAT

LABA-TEX

WATER ABSORBENT BARRIER

General specifications

Dimensions:	150 x 25 cm
Absorbency:	15 liters
Height when saturated:	7 cm

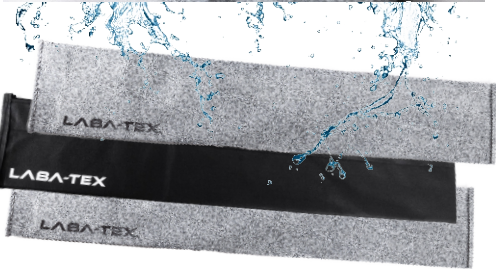

Description

Due to its excellent absorption properties, this absorbent barrier is useful for both prevention and managing spills that have already occurred. It starts working immediately upon contact with water. Rope loops at the ends of the barrier make it easy to pick up and carry the filled absorbent comfortably. It keeps water in a gel state. The dual-chamber design prevents rolling out of position and stabilizes the stacking position

Suitable for Indoor and Outdoor use

Where to use

- Ideal for creating a barrier at garage doors, large windows and entryways
- To create barrier lines and divert water
