Hand Dryer

Reaching  
innovation  
to all hands

## 1 Air vents

The design and distribution of the 108 air vents has been designed to cover the maximum surface area of the hands and minimize noise during operation.

## 3 Chromotherapy

LED lights placed in the upper part of the dryer that alternate a relaxing flow of color while the hands are dried, creating an atmosphere of relaxation and well-being.

## 2 Capacitive sensor

The capacitive sensors, located around the entire perimeter of the drying cavity, allow children and people with reduced mobility to comfortably use the ffuuss hand dryers, since the drying action is also activated when the hands are inserted from the sides.

*Patent ES1159061Y*

Hand Dryer

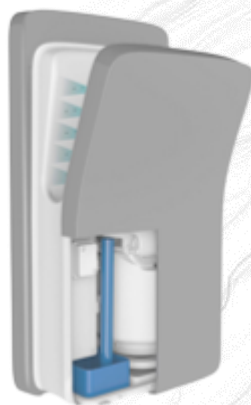

Reduction of  
maintenance  
times and costs

4

## Curtain effect

Cleaner floors with our curtain effect that prevents water drops from splashing on the floor.

*Patent ES1078820Y*  
*Patent EP3058859B1*

6

## Channeling and collecting water

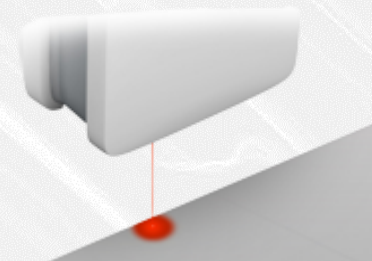

All the water goes directly to a water tank or directly connected to the drain outlet, getting a dry and water-free floor.

5

## Maintenance notice

Unique and silent alarm system. When a fixed red dot is projected on the ground, it means that the water tank has to be emptied.

*Patent ES1078820Y*

7

## Remote control

Telemetry system that anticipates the detection and diagnosis of failures, since it allows via Bluetooth to obtain remote information on the status of the equipment.

Hand Dryer

Creativity and  
technology for  
an unmatched  
experience

## 8

### Air preheating

The preheat is an air heating system that dispenses with conventional resistances. The system is activated and controlled by environmental sensors to avoid constant and unnecessary consumption, making hand dryers more efficient.

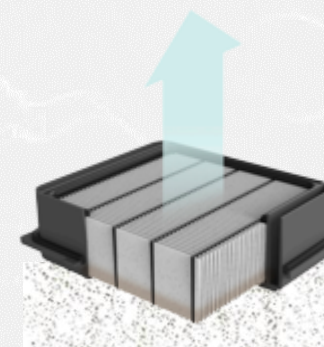

*Patent ES2495720B1*  
*Patent US9538886*

## 9

### HEPA filter and antibacterial treatment

HEPA H13 filter with an efficiency of 99.97% to ensure hand drying with pure air, especially relevant in food and hospital contexts where the hygiene requirement is maximum. In addition, ffuuss hand dryers have been treated with the Biomaster antibacterial additive based on silver ion technology that effectively and permanently inhibits the growth of bacteria throughout its useful life.
